

# Thoughts to Ponder

## Our Mother's Plea

June 2007

[www.jeanwarner.com](http://www.jeanwarner.com)

Mother Earth has nurtured mankind and loved you all since you first inhabited her. Now she is feeling desperate and is in pain. What have you done to her? You have poisoned her atmosphere, her waters, and her land. You have drained much of her oil and mined out her minerals, crystals, and precious stones, all of which have important functions in her body. You have destroyed many of her forests. She is struggling for her life force. Do you not realize that she is a sentient being?

She was created as a beautiful gem in the cosmos, a treasure among the planets. She is greatly loved in the universe, yet many of those who live by the grace of her bounty have had nothing but disdain for her beingness. Like all sentient beings, she needs to be appreciated and to be loved. How often do you take time to show your gratitude and thank her for what she has provided you? Do you ever think about her needs? Your bodies are formed from the substance of her body. You are connected. You are dependent upon her. If she dies, you will also die. Yet you who are consumed by greed and power continue to desecrate her, with no thought for her welfare.

Many of Earth mankind are concerned for her. Many work daily to protect her. Yet, many more are so wrapped up in the daily pattern of living that they seldom give her a thought. Yet there are those who scorn her and are indifferent to her plight.

The goal of Mother Earth is the same as many of you. She wishes to ascend. She no longer wants to live in the third dimension. She desires for as many of her people to ascend into a higher level as are willing to go with her, but she, understandingly, wants to remove herself from those who live in self indulgency. She is cleansing herself of all the negativity that is in her body and her energy field. Through air, fire, and water, she blows out, burns out, or washes out the heavy negative energy that undermines her welfare. She is not trying to kill her children but to maintain a livable home for them, one that can sustain them.

She is preparing herself to go into the Light and longs to have all her children go with her. But the weight of fear, hate, judgment, greed, and self aggrandizement will prohibit many from raising their vibrations to the point of entering a higher realm. Cleanse yourselves of these negative patterns if you want to accompany your Earth Mother on her journey upward. She will once again be a Garden of Eden for those whose consciousness allows them to live on the new Earth.

This will be a world of peace, harmony, love, and joy. The choice is yours. If you choose to move upward, there are many, many light beings willing to help you find your way. Call upon God, or Jesus, or the Angels, Archangels, or any of the Ascended Masters. They will work with you to raise you vibrations so that you can survive the higher frequencies. Thousands stand ready to guide you, but you must ask. Universal law does not allow them to interfere with your free will, so allow yourself to ask for help. No one is going to judge you. It is simply your vibratory rate that determines at what level of the heavens you can live. Give up your fear, for

fear is the base of all negativity. Fill yourselves with love and light and watch your frequency rise until you are in a state of joy.

### Our Mother's Plea

Mother Earth requests our help.  
She wishes to ascend.  
The trials we have put her through  
have simply got to end.

Heartbroken, she is forced to be  
a battlefield for wars,  
and watch her children whom she loves  
be slaughtered by the scores.

Destroyed is nature's artistry,  
her lovely lakes and seas,  
as battles rage and devastate  
her gardens and her trees.

Century after century,  
the pattern has not changed,  
as every generation born  
her beauty has disdained.

We've used her plants, her oil, her gems  
to feed our selfish pride  
and never paused to give a thought  
to pain she feels inside,

or how our reckless ways have changed  
the peaceful harmony  
of her internal makeup and  
her sacred geometry.

She begs us now to change our ways,  
and honor who she is,  
a being who provides our needs  
and gives, and gives, and gives.

So ponder now how life would be  
without what she's bestowed  
and how she's furnished every need  
and what a debt we've owed.
