

Thoughts to Ponder

A Time to Choose

September 2006

www.jeanwarner.com

Let us ponder a little bit about our relationship to God's creation. But first, let me give you a perspective of just where we are in the vastness of space. The following data is taken from a book published in Turkey called THE KNOWLEDGE BOOK:

"There are: 8,748 Galaxies in a Realm, 18,000 Realms in a Cosmos, 18 Cosmoses in a Universe, 1,000 Universes in a System, and 1,800 Systems in a Gurz System." (And this isn't the end of it! There is no end to creation.) Consider the fact that you are one eight-billionth of the population of a very small planet in a relatively small galaxy. But let us contemplate how the vast bodies in space affect us.

To quote from my book MESSAGES FROM THE LIGHT, Planetary Heart Pub., 1999:

You know that within your planetary system there are times when certain planets are closer to Earth than at others....The positions of the heavenly bodies, moving in and out of your neighborhood in a cycle of hundreds or thousands of years, affect the electromagnetic forces reaching your planet. That is, the energies emanating from other planets or solar systems have an effect not only on your planet Earth, but also upon all beings living upon her.

Due to the cycle of cosmic movement, this present period of time is the period that you can receive the most help because of the love energy flowing to you from other cosmic forces. This is the time of enlightenment, the time of regeneration. You have only to accept and allow this help by making the choice to awaken, by declaring your intention, and by putting your focus on trying to live in accordance with that decision.

We are now in a cosmic cycle in which the door is ajar for a unified humanity to enter through the gate, a gateway of preparation for a golden age of brotherly love. This is a rare window of opportunity. Now is the time to accept the help of the heavenly forces who are working in unity to aid us in our awakening; further help will be given us. During the past few years, as we neared the end of the millennium, powerful cosmic beams have been sent to us from the higher realms. These waves of light energy are changing our frequencies and engrafting us with a new power potential.

If we allow this cosmic light to bring us into alignment with the love vibrations of the higher dimensions, our awareness will expand. Our understanding will blossom. Our consciousness will flower. We will begin to recognize who we are and will realize that within us is the spark of the Divine. The God Spirit resides within us, as our Creator has engrafted a spark of His energy into our genes and thus into every cell of our body. Each of us contains this spark. When we recognize this, we will realize that we are all brothers and sisters.

If we choose to remain in our fear-based medium of depression, our bodies will resist these cosmic rays to their detriment. Our minds will become confused and out of balance, and our emotions will respond adversely. We can see this happening.

It is time to unite in brotherhood. It is time to look upon ourselves as a family, to join our hands in loving concern for one another, to do our own thinking and act responsibly, instead of blindly and passively following those who think they are more capable of governing our lives than we ourselves.

We are not alone in our decision making. We have within us the power of the God Spirit to guide and direct us. We only need to ask. Our prayers are always heard, our intent evaluated, and guidance is given in accordance with our highest good. If we are to ascend out of the muddle of darkness we have imposed upon ourselves, it must be by joint effort. But first, we must make a commitment to change our own thought patterns and belief systems from fear-based programming to love-based conditioning. Through reaching for the Light individually, we reflect a field of influence upon the masses.

For eons we have lived in darkness, in judgment, confusion, and ego-centered power struggles. Our cultures have separated us. Our religions have separated us. Our belief systems have separated us. Our local and national boundaries have separated us. We have even allowed the color of our skin to separate us. We have been blind to our oneness as the children of a loving Creator. Instead we have formed hundreds of narrow-minded, judgmental, and self-righteous groups, often led by ego-centered, self-indulging forces focused on materialism, control, and prestige. By pulling together as one, we can climb out of the darkness into the light of hope. Let our commitment be to the brotherhood of Mankind. Together we can build peace, contentment, and brotherly love.

Hark to the Call

The call to waken now goes out.
It's time to dance, it's time to shout.
Let every heart with joy now sing.
At last we are awakening

The age of darkness fades away.
More light creeps in each dawning day.
Its rays spread out o'er all the land.
The power of love is now at hand.

And every being here on Earth
will feel the joy of its rebirth,
for every life will soon expand
as holy Light now bathes the land.

The trees and flowers and wildlife too
will heed the call and hearken to
the urge to let go of the past
and bask anew in Light at last.

And anger, hate, and pain will fade
into the shadows. Unafraid,
we will emerge from out the night
and be resplendent in the Light.

Poem from SECRETS EXPLORED, Book One, By Jean Warner, OPA Publishing 2006
